

2025 CHEVROLET | GMC 1500

SPORT SERIES 6" SUSPENSION SYSTEMS

Dominate the Road and the Trail with the New Sport Series 6" Suspension Systems.

Fabtech's Sport Series Suspension Systems feature our world-renowned IFS suspension design for the Chevy/GMC 1500 providing excellent drive ability both on and offroad. There is zero bump steer throughout the suspension cycle that helps reduce drive fatigue while improving the overall drive ability of the vehicle.

The near stock track width keeps the tires under the fenders for a clean appearance. Fabtech's proprietary steering knuckle geometry provides excellent lock to lock turning radius to maneuver in tight spots.

Heavy duty 1/4" thick steel crossmembers feature OE style alignment cam pins that utilize the factory cams for easy adjustment. Triple front diff mounts reposition the differential for vibration free operation at high speed.

The factory coil over shocks relocated from the bottom, to allow for full steer while achieving 6 inches of lift. Rear lift is accomplished with a 5" Block and U-bolt system.

Fabtech has addressed all aspects of the suspension for proper wheel travel and lock to lock steering without over cycling. All FABTECH systems come with a free 5-year 60,000-mile Powertrain Warranty.

- Sport Series with optional shock choices
- Increased ground clearance
- Easy installation
- Does not fit GMC AT4 or Chevy Trail Boss models
- Will not fit vehicles with Super Cruise
- KITS CONTAIN ROUND STYLE U-BOLTS, PLEASE VERIFY YOUR APPLICATION

Made in the **USA**.
